

NAIAD

Nerve Agent Immobilise, Enzyme Alarm and Detector: Advanced Nerve Agent Detection System

At the core of Wescom Defence's Nerve Agent detection product line stands the NAIAD (Nerve Agent Immobilise, Enzyme Alarm, and Detector), an unparalleled solution designed for military settings and survival scenarios. Recognised as the only nerve detector worldwide capable of identifying ALL known and unknown agents, including potential future variants, NAIAD features unique capabilities that set it apart.

TEST CAPABILITIES

- + ALL known and UNKNOWN nerve agents, including potential future variants
- + Hydrogen Cyanide

KEY FEATURES

UNIVERSAL DETECTION

NAIAD excels in detecting nerve agents at sub-miosis levels, offering unparalleled sensitivity. The NAIAD is unique in its capability to provide warnings under both attack and low-level ongoing exposure conditions.

ADAPTIVE RESPONSE

Resilient to masking and corruption of agents, NAIAD remains responsive, ensuring a continuous and reliable detection system. Selectivity minimises false alarms, enhancing its effectiveness in real-world scenarios.

EXTENDED CAPABILITIES

NAIAD goes beyond nerve agents, detecting attack concentrations of Hydrogen Cyanide, further fortifying its role in comprehensive chemical threat detection.

VERSATILE DEPLOYMENT

Whether in man-portable, fixed, or vehicle formats, NAIAD caters to diverse operational requirements. It extends its utility to vessels, offering Citadel protection.

BENEFITS

+ Proven Generic Detection

NAIAD excels in generic sub-miosis nerve agent detection, ensuring comprehensive coverage in various scenarios.

+ Inbuilt Monitoring

Equipped with inbuilt monitoring equipment, NAIAD confirms operational status, enhancing overall reliability.

+ Safe Air Analysis

Facilitating air analysis outside protected environments, NAIAD ensures the safety of those inside, providing a crucial advantage in survival scenarios.

+ Adaptable to Conditions

Operating seamlessly under both battlefield and homeland conditions, NAIAD is a dependable solution for military applications.

+ Hydrogen Cyanide Detection

Beyond nerve agents, NAIAD extends its capabilities to detect attack concentrations of Hydrogen Cyanide, adding an extra layer of threat recognition.

+ Versatility in Formats

Available in man-portable, fixed, or vehicle formats, NAIAD adapts to diverse operational needs, enhancing its practicality in the field.

+ Proven Reliability

Equipped Tested and proven in demanding environments, including naval settings, NAIAD has demonstrated reliability over many years, ensuring consistent performance in critical situations.

Enhance your defence capabilities with Wescom Defence's NAIAD, the only worldwide nerve detector capable of identifying ALL known and UNKNOWN nerve agents, including potential future variants. With exceptional test capabilities, unique features, and proven reliability, NAIAD offers unparalleled benefits for comprehensive chemical threat detection. Rely on excellence, detect with certainty.

SPECIFICATIONS

Size	Customisable dimensions to suit operational requirements
Weight	Varied options, ensuring adaptability
NATO Codified	NSN 6665-99-966-1252
Shelf Life	Extended shelf life for sustained readiness (Specific duration provided upon inquiry)
