

Peroxide Explosive Response Kit

In the current landscape of heightened danger from terrorists and criminals lacking access to sophisticated bomb-making equipment, Peroxide Explosives pose a significant threat. These explosives, characterised by high force and low stability, can be detonated by minor shocks, thermal disturbance, or small electrical currents, making them particularly hazardous. Wescom Defence, in collaboration with UK authorities in explosives and nerve agent detection, introduces the Peroxide Explosive Response Kit (PERK). PERK is designed to mitigate the risks of detonation, safeguarding the lives of both service personnel and the general public.

TEST CAPABILITIES

+ Peroxide Explosives

KEY FEATURES

SPECIALISED EXPERTISE

Developed in collaboration with UK authorities, leveraging Wescom Defence's experience in explosives and nerve agent detection.

VERSATILE CONFIGURATIONS

Available in a range of configurations to suit specific applications, enabling response units to address varying quantities of explosive material.

REFILL KIT AVAILABILITY

Incorporating sustainable practices, offering cost savings through reusable components, refill kit availability, and an emphasis on energy-efficient manufacturing processes.

COMPREHENSIVE THREAT RESPONSE

Targets the increasing risk posed by Peroxide Explosives to transport organisations, Search Teams, and Bomb Disposal Units.

USER-FRIENDLY EQUIPMENT

Easy-to-use design allows authorised personnel to respond effectively and swiftly to threats, minimising the risk of detonation.

BENEFITS

- + **Risk Reduction**
Significantly reduces the risk of detonation for service personnel and the public.
- + **Adaptable Configurations**
Enables tailored responses to specific scenarios, accommodating different quantities of explosive materials.
- + **Quick Response**
Facilitates swift response to threats, minimising the time between detection and risk mitigation.
- + **Enhanced Safety Measures**
Provides an in-situ solution for personnel regularly involved in premises or vehicle searches, ensuring their safety.

APPLICATIONS

PERK is essential for various scenarios where Peroxid Explosives may be encountered, including but not limited to:

- ✓ Premises Searches
- ✓ Vehicle Searches
- ✓ Bomb Disposal Operations
- ✓ Aircraft Inspections
- ✓ House Searches

Wescom Defence's Peroxide Explosive Response Kit (PERK) stands as a pivotal solution in the ongoing efforts to combat the rising threat of Peroxide Explosives. With its specialised features, adaptable configurations, and proven expertise, PERK is the tool of choice for authorised personnel entrusted with the critical task of safeguarding lives and property. Rely on excellence, detect with certainty.

SPECIFICATIONS

Size	Customisable dimensions to suit operational requirements	
Weight	Varied options, ensuring adaptability	
NATO Codified	PERK Kit	NSN 666-99-219-7256
	PERK Refill	NSN 666-99-551-6468
Shelf Life	(Specific duration provided upon inquiry)
