

Residual Vapour Detector

The Wescom Defence CW RVD (Residual Vapour Detector), an integral member of the Wescom Defence Chemical Warfare Agent (CWA) detection equipment family, is meticulously designed for deployment in military settings, catering to the needs of military personnel, security services, first responders, hazard material teams, and decontamination units.

TEST CAPABILITIES

- + Residual Nerve Agents
- + Sulphur Mustard Agents
- + Blister Agents

KEY FEATURES

NON-ELECTRONIC DE-MASKING AID

The CW RVD Kit is a highly effective, non-electronic solution that swiftly detects residual amounts of nerve agents, Sulphur Mustard agents, and Blister agents.

PROVEN TECHNOLOGY

Leveraging small volume wet chemistry, the CW RVD Kit employs a colorimetric result system, proven by years of successful use by NATO forces and relied upon by operational forces today.

TRAINING KIT AVAILABILITY

A safe and non-hazardous kit is available for classroom and field training, ensuring comprehensive preparedness.

PPE SAFETY ASSURANCE

When contemplating the removal of Personal Protective Equipment (PPE), the CW RVD Kit facilitates the safe assessment of residual Nerve Agents, Sulphur Mustard agents, and Blister agent vapours in the air, ensuring secure removal or retention of PPE equipment in the sampled area.

CUSTOMISABLE AND PORTABLE

With a customisable case, the CW RVD Kit is tailored for military, security services, first responders, hazard material teams, decontamination teams, and non-military personnel. It is lightweight, portable (weighing <500g), and features a 5-years shelf life. Ticket packs and bottle assemblies as replacement items reduce the need to discard the entire kit, minimising operational costs.

BENEFITS

- + Field Proven**

Trusted by military and operational forces worldwide.
- + Class Leading Sensitivity and Specificity**

Offers superior detection sensitivity and specificity for Nerve Agents, Sulphur Mustard agents, and Blister agents.
- + Quick Time Result**

Provides results in less than 6 minutes, enabling rapid decision-making.
- + Reliable Reproductive Results:**

Ensures consistent and dependable outcomes for every test.
- + Customisable Case**

Tailor-made for diverse military and non-military applications.
- + Non-Electronic**

Operates without electronic components, minimising potential vulnerabilities.
- + Light and Portable:**

Weighing under 500g, the CW RVD Kit is easy to carry and deploy in various operational scenarios.
- + PPE Compatibility:**

Can be effectively and safely used while wearing Personal Protective Equipment.

The Wescom Defence CW RVD - swift and reliable detection of residual Nerve Agents, Sulphur Mustard agents, and Blister agents. Trust in its field-proven performance to enhance safety and preparedness for military, security services, and first responders. Upgrade your defence capabilities today with the Wescom Defence CW RVD. Rely on excellence, detect with certainty.

SPECIFICATIONS

Size	16cm x 15cm x 7cm	
Weight	<500g	
Test Quantity	15x nerve agent tests, 15x mustard & blister agent tests	
NATO Codified	RVD Kit Operational	NSN 6665-99-479-7521
	RVD Kit Training	NSN 6910-99-324-4785
	RVD Test Tickets	NSN 6665-99-814-7271
	RVD Bottle Assembly	NSN 6665-99-885-4577
Test Time	< 6 minutes	
Shelf Life	5 years
